

COCOCRAFT

Eggheads!

While waiting for the school to start again, let's plant seeds and observe their germination

Concept

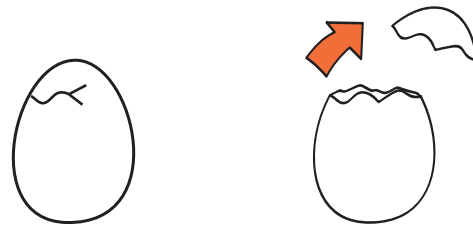

Catherine Lucas

Material

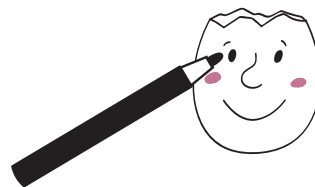

- eggs
- markers
- seeds: lentils, or quinoa, or beans, ...
- cotton balls

Instructions

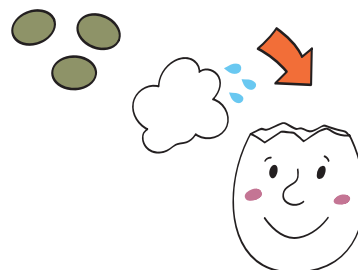

Ask help to gently break the top of your eggs, with a knife. Empty your eggs in a bowl (keep them for a cake?)

Draw a face on your egg using the markers.

Put in this egg head a wet cotton ball, and put on the top the seeds.

Now you just have to wait some days for germination. Place your eggs in the light, near a window. Check that the cotton remains wet, your seeds need water to germinate.
